

IALA Workshop on Development of VHF Data Exchange System (VDES)

15 – 19 February 2016

Conference Studio FUKURACIA
Shinagawa Crystal Square,
6-41, Kohnan 1-chome, Minato,
Tokyo 108-0075,
Japan

Background

Over the last number of years, IALA has been heavily engaged in development of the IMO e-navigation concept, including aspects of data communications. The VHF Data Exchange System (VDES) is seen as an effective and efficient use of radio spectrum, building on the capabilities of AIS and addressing the increasing requirements for data to be transferred through the system. There is a need to provide guidance on VDES technologies, VDES operational concept, testbeds and IMO performance standards to assist IALA National and Industrial Members in the efficient development and deployment of maritime data communications.

Topics

The workshop will cover subjects related to data communications such as the development of VDES by exchanging information on VDES testbeds conducted by various authorities, institutions and industries, especially in the Asia Pacific region; VDES technologies such as the frequency plan, modulation scheme, access scheme, sharing method; VDES operational concept based on user requirement, use case, etc.; the use of VDES in the realisation of e-navigation and modernization of GMDSS. The programme will include a half day open Forum.

Objective

The objective of the workshop is to provide an opportunity for participants to understand and develop the technology and operational aspects of VDES. This will enable knowledge sharing on VDES, the drafting of IALA documentation on VDES Technologies and VDES Operational Concept, updating of the VDES testbed list, preparing a draft IMO paper on proposal for unplanned output “development of IMO performance standards and associated guidelines for shipboard VDES” for submission to MSC 96. A half-day Open Forum will be opened to public and the Workshop participants with an expected audience of the up to 150.

Process

The Workshop will include presentations on various aspects relevant to the VDES. The programme includes discussion periods and also work on draft IALA documentation. The intent is that the Workshop report will contain recommendations for areas of further work.

Attendees

The Workshop is directed towards all IALA members, maritime authorities and administrations, universities, scientific bodies, manufacturers, service providers and integrators, standards organisations as well as consultants in VTS, GMDSS, AtoN, terrestrial components of the WWRNS etc. with interests in e-navigation.
