The International e-Navigation Underway Conference is a global destination for discussion and debate about the many different challenges facing e-Navigation around the globe.

It is an impressive forum both in terms of its sessions and in the range of networking opportunities it affords.

Meet and network with key professionals within the maritime industry and regulatory bodies.

Featuring some of the top maritime leaders in their fields and covering a wide breadth of topics, the Conference is the place to explore new strategies and chart future technological progress.

This years high profile speakers and experts within the area of e-Navigation will include Mr Niels Smedegaard, CEO of DFDS.

With the approach of the planned implementation of the Maritime Service Portfolios (MSP), there will be a specific focus on the MSP at this conference. The conference will focus on a number of themes, these being:

- **Issues relating to the IMO/IHO Harmonization Group on Data Modelling (HGDM)**
- **Including definition of MSP's and S-100 product specifications**
- **e-Navigation and autonomous operations; complementary technologies**
- **Practical solutions from testbeds**
- **Infrastructure and communication means in support of e-Navigation**
- **e-Navigation services in the Polar regions**
- **e-Navigation and big data**
- **Advances in S-mode**
- **Maritime Service Portfolios (MSP)**
