

# R-Mode roadmap (Draft IALA workshop on R-Mode 2019)

ENAV24-6.1.17.1

Main input is provided by ongoing R-Mode projects

Site selection & calibration;

Traffic density & R-Mode coverage

Baltic Sea testbed; prototype receiver; first monitors set up;  
algorithm for position solution; coverage prediction for  
several countries; Minimal stakeholder requirements

Mitigation of skywave; Transmitter near field PLL; Antenna  
investigation; clock error; ASF; correction for ground wave;  
IMO performance standard

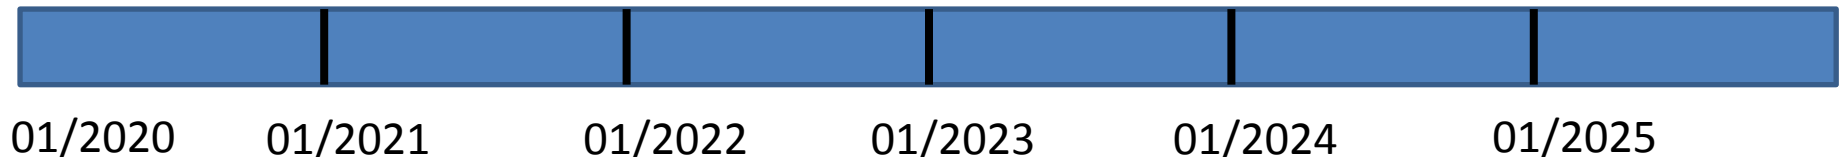

Korea testbed available; impact of tides, salinity  
and ice; R-Mode simulation tool; Test of  
alternative MF approaches (4 CW); different MF  
channel use

IEC standard

Stakeholder  
requirements

System  
design
