DTEC4-15.3.1  
27 03 2025

## **LIAISON NOTE**

### **Review of IALA G1153 – Template for the Review of Emerging Technologies for Possible Use by IALA Members**

#### **1 INTRODUCTION**

In response to questions from DTEC3, LAP 27 provided input to clarify the current guideline, specifically with regards to possible requirements to amend wording following the change in status of IALA from an NGO to an IGO.

The response was reviewed during DTEC4, resulting in proposed revisions to G1153.

#### **2 DISCUSSION**

Following the review of the input received from LAP, the DTEC Committee agreed to amend G1153, as attached. Specifically, changes were made to reflect the recommendations from LAP:

Deletion of references to the working group

Maintaining the essence of the guideline as a useful tool for assessing new and emerging technologies

Continuing the review of technologies as received by the Committee as an internal process.

In carrying out the revision, the members wish to confirm that the response is appropriate to the feedback from LAP. As such, the revised version (in track changes) is being forwarded for consideration prior to final approval by the Committee for forwarding to IALA Council.

#### **3 ACTION REQUESTED**

- The LAP is requested to note the input from the DTEC Committee regarding revision of G1153, and advise DTEC 5 of any further comments.

Attachment – IALA G1153, revised (track changes)
