Some o

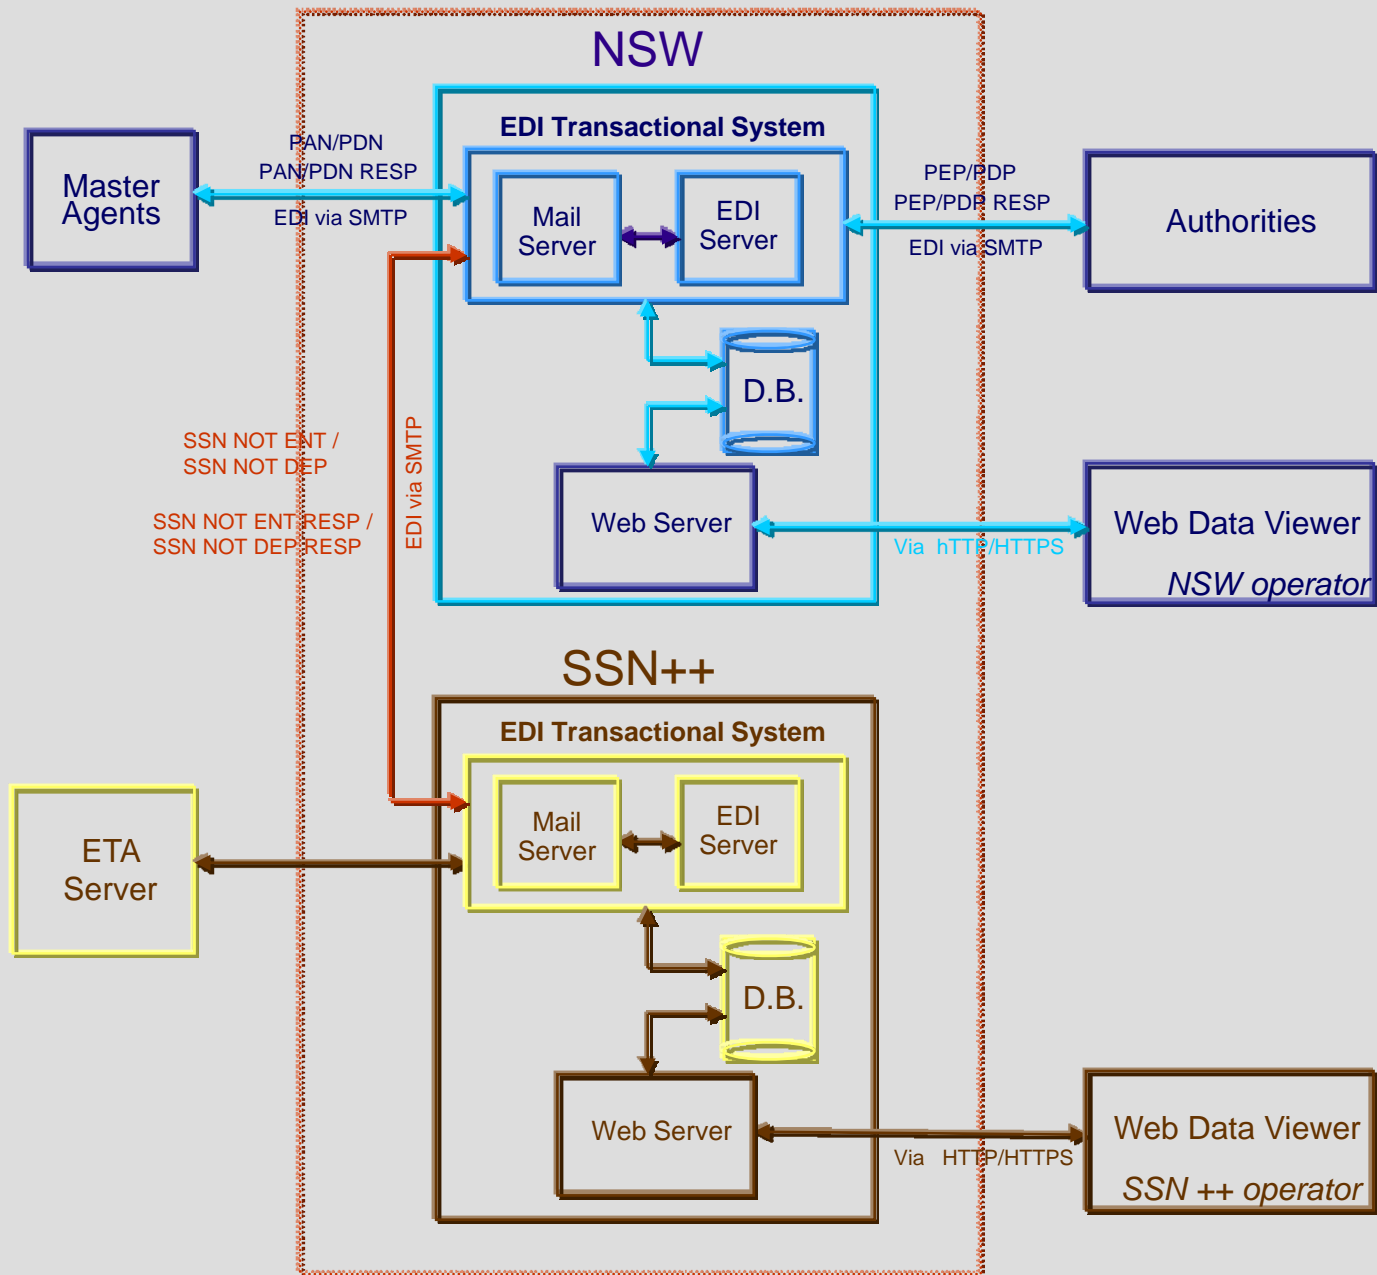

Some of it !

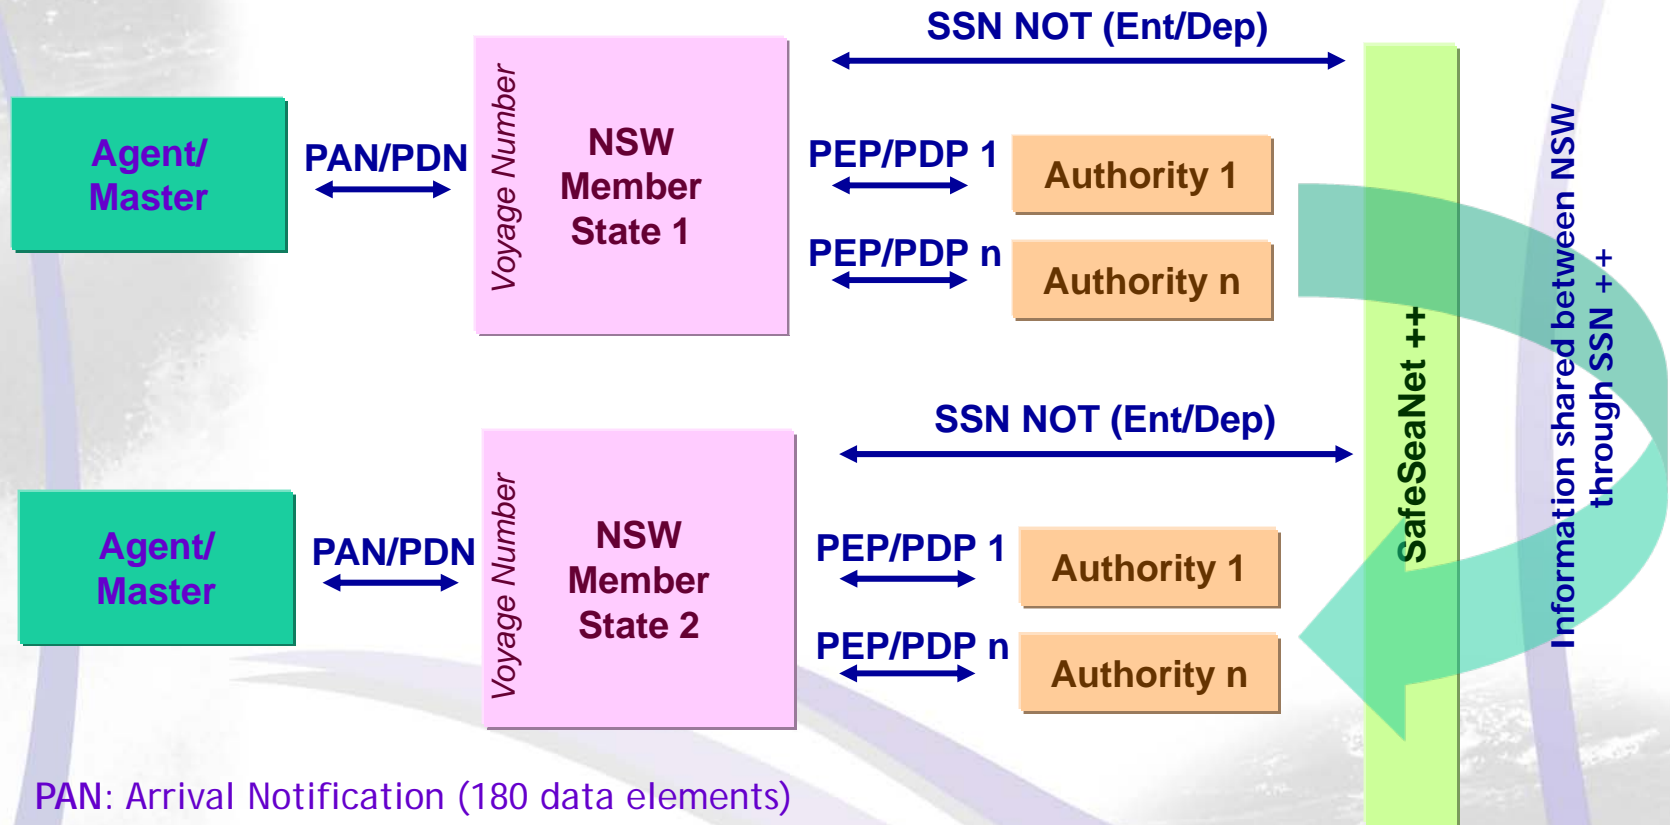

MarNIS: Single Window Concept

System Architecture

BASICS OF THE CONCEPT

PAN: Arrival Notification (180 data elements)

PDN: Departure Notification

PEP: Entrance Profile (one per Authority: Harbour Master, Port Authority, Immigration, Customs, etc)

PDP: Departure Profile (one per Authority)

SSN NOT ENT : Safeseanet Notification (Entry)

SSN NOT DEP: Safeseanet Notification (Departure)

Outside Europe

PAN initial

**PAN
EU waters**

PAN final
24hrs before arrival

Inside Europe

PAN initial

PDP
(from PDN)

PAN final
24hrs before arrival

updates

Final PEP's and clearance

Phase 0: Departure from Non EU Port

(Port/Pre-) Entrance/Departure Profiles (1)

Nowadays:

- Master/agents reports to different authorities
- More or less the same information
- Often making use of IMO FAL messages/forms

MarNIS:

- Master/agent reports only once to NSW
- Make use of already available information at other authorities and reference databases
- NSW compiles Entrance/Departure Profile Messages
- NSW informs the other Authorities

(Port/Pre-) Entrance/Departure Profiles(2)

- IMO FAL messages
 - Overlap in information
 - Authorities select the information they need and ask often for additional information
- PEP/PDPs
 - Tailor made, directly linked to the tasks of the authorities
 - More information related to the tasks
 - Cross Reference Checks
- Based on PEPs Port Clearance will be given

PEPs and PDP's

- Dangerous goods PEP/PDP
- Arrival info PEP
- Departure info PDP
- Safety PEP
- Emergency PEP
- Port Security PEP/PDP
- Port Planning PEP/PDP
- Health PEP/PDP
- Port Environment PEP/PDP
- Immigration PEP/PDP
- Customs PEP/PDP

X FULL DATA REQUIRED

R DATA COULD BE RECOVERED FROM NSW/S

m MINIMUM DATA REQUIRED

- NOT REQUIRED

...Additional Elements...

- Voyage Plan Server
 - Expected vessels
 - Data
- ENC/ECDIS updating
- NavTex / SMS / ECDIS
- CTA Server
-

...NSW & SSN++ benefits....

- Sharing information, co-operation between authorities
- Simplifying reporting / less burden
- Reuse of data
- Improved availability, reliability and quality
- Relevant data to relevant Authority : tailor-made
- One reference point for the vessel in the port
- All Authorities, not only maritime

E-Navigation Core Objectives

- facilitate safe and secure navigation of vessels having regard to hydrographic meteorological and navigational information and risks;
- facilitate vessel traffic observation and management from shore/coastal facilities, where appropriate;
- facilitate communications, including data exchange, among ship to ship, ship to shore, shore to ship, shore to shore and other users;
- provide opportunities for improving the efficiency of transport and logistics;
- Support the effective operation of contingency response, and search and rescue services;
