LIAISON NOTE

Draft IALA e-Navigation road map

1 INTRODUCTION

This liaison note introduces the draft IALA e-Navigation road map, developed by the ENAV Committee at ENAV18.

2 DISCUSSION

Until recently, the ENAV Committee maintained a road map for e-Navigation. This consisted of key milestones at international organisations such as IMO and ITU, presented on a couple of Microsoft PowerPoint slides.

The format of the road map has now been changed (now in Microsoft Word format). The draft e-Navigation road map (attached) now provides a pan-IALA perspective on IALA's activities concerning e-Navigation and related maritime domain developments.

This document is a high-level representation of how overarching concepts and strategies such as the former IMO Secretary General's proposal of a Sustainable Maritime Transportation System (SMTS), IMO's e-Navigation strategy and its implementation plan and IHO's Universal Hydrographic Data Model (UHDM; S-100) can be applied in a coordinated manner to contribute to IALA's vision.

Please note that the time lines for the various tasks have been placed unilaterally by the ENAV Committee. The ENAV Committee welcomes substantial feedback and amendments on the road map.

3 ACTION REQUESTED

All IALA Committees are requested to review the attached draft e-Navigation road map PAP31-7.1.4.2 (ENAV18-14.1.30) and provide feedback to the ENAV Committee.

PAP requested to consider the attached draft e-Navigation road map ENAV18-14.1.30 in support the development of the IALA e-Navigation policy.
