LIAISON NOTE

Dictionary definitions

1 INTRODUCTION

The VTS Committee considered VTS43-4.2.2, the DWG liaison note to VTS Committee regarding Dictionary definitions and could not find any compelling need to revise the proposed definitions. Recalling paragraph 8.2 of Council 62 report in June 2016; “The Council delegated approval authority of new terms and definition and revised definitions to the PAP Dictionary Working Group, with the exception of terms and definitions already approved by the Council as part of existing official IALA documents”, the VTS Committee underlines that the subject definitions originate from Guideline 1110 and Guideline 1111 which have already been approved by Council in December 2014 and May 2015 respectively.

The definitions in questions shall therefore remain unchanged until these Guidelines are revised.
