Ref: VTS37/13-651

Dear Mr. van Waard,

The IALA VTS Committee would like to thank TNO for attending VTS37 and for the interesting presentation on the further development of CARPET for VTS purposes.

Your presentation generated a number of comments and it was unfortunate that, due to time constraints, there was only limited time for a discussion.

During the week, the Committee considered the presentation further and a number of issues were identified with regards to the TNO proposal. In addition, a number of alternative options were considered.

The Committee concluded if it would be beneficial in further discussion and suggested it may be appropriate for TNO to organise an event on radar modelling and invite interested members of the Committee and other stakeholders for further discussion.

With best regards

Gary Prosser
Secretary General
