

**IALA COUNCIL
62nd session**

**21-24 June 2016
Lisbon
Portugal**

11 – TECHNICAL ACTIVITIES

11.3 – VTS

Withdrawal of IALA Guideline 1056 on the Establishment of VTS Radar Services

Note by the VTS Committee

1. INTRODUCTION

The outcome of the review of IALA Recommendation V-128 resulted in the approval in May 2015 of a modified Recommendation V-128 on the Operational and Technical Performance of VTS Systems together with an associated Guideline 1111 on the Preparation of Operational and Technical Performance Requirements for VTS Systems.

As a result the existing IALA Guideline 1056 on the Establishment of VTS Radar Services (Edition 1 June 2007) has now been superseded by the radar section in Guideline 1111. Thus, Guideline 1056 should be withdrawn.

2. THE COUNCIL IS REQUESTED TO

Approve the withdrawal of IALA Guideline 1056.
