11.4 – ENAV

11.4.8 – ENAV documents for record purposes

ITU liaison note addressing a new revision of ITU-R M.1371

Note by the Secretariat

1. BACKGROUND

The ENAV Committee continues to monitor the AIS specification ITU-R M.1371 and was notified by the ITU that the document will be revised to accommodate the Chinese BeiDou system. However, the IEC has been collecting various other minor changes and we know we will need to address the issue of autonomous devices Resolution 364.

2. REVISION

The liaison note ENAV19-14.1.22 explains the additional work items that should be considered by ITU-R WP 5B before ITU-R M.1371 is revised and requests that the revision be held until those items are addressed.

3. THE COUNCIL IS REQUESTED TO

The IALA Council is requested to approve the draft ITU liaison note, ENAV19-14.1.22, for submission to next meeting of ITU-R WP 5B before the input papers deadline of 28th October 2016.¹

¹ The paper (C63-11.4.8.3.1) got early Council approval and was forwarded to ITU on 25 October 2016
