

Liaison Note to IEC TC80 WG15

Specification for VDES

1 Introduction

IALA has prepared the material in Annex A of this liaison note and would like to provide it to IEC TC80 WG15 to facilitate future work item proposals for VDES test standards.

2 Action requested

The IEC TC80 WG15 is requested to consider this annex as a baseline and timeline defined below for developing a future IEC test specification that may be used for VDES certification taking into account the possible separation of the testing of ASM and VDE devices.

The IEC TC80 WG15 is requested to consider the attached draft Recommendation ITU-R M.2092-0+ with IALA comments, C65-11.4.3.6.
