

10 – TECHNICAL ACTIVITIES

10.1 – Committee work organisation

10.1.2 – Revised Committee work programme 2018-2023

Note by the Secretariat

1. BACKGROUND

The purpose of the committee work programme is to clearly identify any items of work with outcomes and priorities taking into account the Strategic Vision 2018-2026, the current drivers and trends, and the IALA position document on the development of Marine AtoN.

Each committee has a work plan, which details the overall work of the committees including work on documents, events and cross committee work.

In addition, each task group has a task register for each task, which details the objectives, scope, and descriptions of the task.

2. REVISED WORK PROGRAMME

Due to the postponement of the 20th conference in Brazil to 2023, the PAP revised the current work programme and updated it to cover the period 2018 – 2023.

Several new work items were included in the programme and the traffic light indicators have been updated accordingly within the spreadsheet (C73-10.1.2.1).

3. THE COUNCIL IS INVITED TO

Note the information provided and **Approve** the work programme (C73-10.1.2.1).
