

**IALA COUNCIL**  
**75<sup>th</sup> session****30 May – 3 June 2022**  
**Copenhagen**  
**Denmark****8-Strategy and Policy****8.1 Current Drivers and Trends****8.1.2.1 IMC Input on Current Drivers and Trends**

Note by the Industrial Members Committee

**INTRODUCTION**

This document summarizes a proposal for consideration when the Council Strategy Drafting Group meet to discuss the *Drivers and Trends* document.

**DISCUSSION**

At a meeting of the Council Strategy Drafting Group the *Drivers and Trends* document was discussed at Council 74. The document was amended, but the IMC note that there were comments from Councillors regarding the inclusion of visual AtoN and that the Group will reconvene at Council 75 to discuss that point.

The IMC propose an entry on visual AtoN in the *Drivers and Trends* document. This proposal is a short sentence that may sit in section 3 of the document and reads as follows:

*“Whilst these trends may seem daunting; many National members are well equipped with physical AtoN infrastructure that meets the present demand. And that can provide the platform for the provision of these additional services. In conjunction, a number of Industrial members are responding with developing or integrating these demands within their products.”*

**THE COUNCIL IS REQUESTED TO**

**Note** the information provided and take action as it deems appropriate.
